

### 7.13 Technology Catalog of Support

The Technology Catalog of Support (TCS) was specifically created for faculty to assist in finding their way around Western's technology resources. The catalog is online for ease of use on and off campus. The Catalog covers everything from who to contact for technology questions or problems, to what accounts will be assigned when they arrive on campus, as well as the WCU computing policies. Each academic year, the TCS is updated to reflect the technological changes that have occurred. To access the catalog, click on the following link
